

AusACPDM Listening and Sharing session

Running sports-focussed interventions in different contexts. Sports Stars in the bush, Brazil and babies.

Join us in our free listening and sharing session

Wednesday 30th March, 2022, 4.30pm Australian AEDT (3.30pm AEST)

The aim of our AusACPDM Listening and sharing sessions are to share our experiences and learnings.

Topic information: Sports Stars is a practitioner-led, peer-group sports intervention that aims to prepare children for transition out of health-focussed interventions, and into participation in community sport. In this session, Georgina will share her experiences and learnings from adapting Sports Stars so that it can be run in different geographical and cultural contexts, including rural/remote Australia and Brazil, and in different population groups, including for children with CP, Autism or JIA, young children referred for gross motor delay, and groups with children with a variety of disabilities. This session will include practical information on the role of Physical Literacy in meaningful sports participation.

This session would be enjoyed by people with an interest in sports participation of people with disabilities including clinicians, researchers and people with disabilities and their families.

Speaker: Dr Georgina Clutterbuck

The session will be facilitated by: Dr Megan Auld
